Monday 11.1.21

Pick any mental strategy to answer these questions

1. 764 + 7 =

2. 9 + 219 =

3. 333 + 6 =

4. 105 + 7 =

5. 4 + 238 =

6. 345 - 7 =

7. 195 - 9 =

Think about which strategies you used to solve the calculations.

Can you complete the missing number calculations

330 + _____ = 336

6 + _____= 237

5+ _____= 542

Tuesday 12.1.21

Choose a 3 -digit number and a multiple of 10. Add them until you have used them all

199	40
578	60
400	30
609	20
312	90
345	80

For example 400+30 =430

Challenge - Find 2 numbers that add to make 608 then 425 and 229

For example 600 +8 =608

Wednesday 13.1.21

Choose a 3 - digit number and subtract a multiple of 10 until you have used them all

345	40
199	60
578	30
400	20
609	90
312	80

Challenge – Find 2 numbers that subtract to make 425 then 630 and 350

For example;

450- 25 = 425

Thursday 14.1.21

Add or subtract these multiples of 100 to and from 3 digit numbers.

456+200=

843-500=

763+200=

545-300=

982-400=

786+100=

Can you make up your own calculations that add or subtract multiples of 100 to and from 3 digit numbers.

Friday 15.1.21

Challenge! Can you make 999 by adding 2, 3 digit numbers? How many ways can you do this? I will start you off;

300+699

999
